

- **Derecktor Shipyards** contracted New Age Blast Media to deliver 12 tons of our Extra Coarse 10-40 product in January 2007 for blast work on a 250ft. aluminum hulled ferry in dry dock at their **Bridgeport Ct Shipyard**.
- NABM's performance was being evaluated vs. garnet. Product was used at 90 psi. Key criteria for comparison: 1. profile 2. SP10 finish 3. Coverage rate and 4. Breakdown/Dust rate.
- **Derecktor's** Blast Supervisor was impressed by the performance of New Age Blast Media in all areas of comparison to garnet.
- Profile of 2.5-3.0 was deemed on target for re-coating. Finish was SP10.
  
- Here is a written comment from **Derecktor's** Purchasing Manager:  
*"Overall....excellent product...excellent price...excellent reliable service. Can't beat that !!"*
